

CLAIMS

1. A system for fixing (3) a grip handle (2) to a container (1) of an item of cookware comprising a stud (4) which comprises a body (13) adapted to be fixed to the container (1), and a flame guard (5) which is adapted to surround the stud (4) and which comprises a side wall (10) and an annular shoulder (11) projecting from the side wall (10) to the interior and defining an opening (16) through which extends the stud (4), characterised in that the stud (4) comprises a flange ring (14) which projects from the body (13) to the exterior, the distance separating the flange ring (14) from the end (6) of the body (13) adapted to be fixed to the container (1) and that separating the annular shoulder (11) from the end of the side wall (10) adapted to come into contact with the container (1) are such that, when the handle (2) approaches the container (1), the annular shoulder (11) abuts against the flange ring (14) just before the end of the side wall (10) of the flame guard (5) abuts against the container (1).

2. The system of fixing (3) as claimed in Claim 1, characterised in that the annular shoulder (11) is monobloc with the side walls (10) of the flame guard (5).

25 3. The system of fixing (3) as claimed in Claim 1 or 2, characterised in that the flange ring (14) is monobloc with a body (13) of the stud (4).

30 4. The system of fixing (3) as claimed in any one of Claims 1 to 3, characterised in that the flange ring (14) is located at the end (6) of the stud (4) adapted to be fixed to the container (1).

35 5. An item of cookware comprising a container (1), a grip handle (2) and a system for fixing (3) the handle (2) to the container (1) as claimed in any one of Claims 1 to 4.
